#### The Plan at 30,000 ft

#### Teams:

Register teams of 3-4, which can include students from other departments and schools (UT EID required), but one student must be a UT PGE student. At least 1 undergraduate student per team.

#### Awards:

Winners of the A.I. Hackathon will be awarded bragging rights and \$5,000 for first place, \$2,500 for second place, \$1,000 for third place and \$500 for fourth place teams.

#### The Hackathon Rules

### **Submit to GitHub by Noon March 27th:**

- 1. Well-documented Python workflow in a Jupyter Notebook
- 2. Results as a .cvs DataFrame with 3 well locations (x, y, unit (upper or lower) and estimated 2 year cumulative production.
- Short presentation with executive summary, goals workflow choices and defense, results and discussion. Every team member participates in the presentation.

**Participation:** All team members contribute to the above products. There are various roles! Participate in sessions.

**Coding:** Use only open source and methods / workflows developed by during the hackathon. Provide code for testing and scoring. All code in Python, Jupyter Notebook. **Readable code!**
